Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Response to Amendment

1. This action is responsive to an Amendment filed 12/22/2005. Claims **15-30** are pending. Claims **1-14** have been cancelled. Claims **15-30** are new. The examiner hereby withdraws the objections to claims **5, 7, and 11** in light of the amendment.

Response to Arguments

2. Applicant's arguments filed 12/22/2005 with respect to claims **15-30** have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims **15, 16, 19, 20, 23, 24, 27, 28** are rejected under 35 U.S.C. 102(e) as being anticipated by Daniels.

Referring to claims **15, 16, 19, 20, 23, 24, 27, and 28**, Daniels discloses an information processing apparatus/method, comprising a server configured to store a program table stating pictures in text, the server further configured to allow a user to select programs on the program

Art Unit: 2617

table, the user accessing the server from a remote device through a network, and the server further configured to transmit data to the remote device of the user based on the user selections in the program table, the transmitted data for controlling the recording of a picture at the user remote device, and including data for specifying a channel, data indicating the date and time for starting the recording, and data (duration data) indicating the date and time for terminating the recording to a picture recording apparatus (p. 13, paragraphs 131 & p. 14, paragraph 144)(Figs. 7, 24).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 17, 18, 21, 22, 25, 26, 29, 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Daniels in view of vCalendar Specification, v0.4.

Referring to claims 17, 21, 25, and 29, Daniels discloses the information processing apparatus/method according to claims 15, 19, 23, and 27, respectively. Daniels also discloses that a calendar scheduling application is operated depending on VCR control information (p. 13, paragraph 136). Daniels further discloses that VCR control information can be updated via email (p. 14, paragraph 140). Daniels does not disclose that the transmitted data is data of a v-calendar system. vCalendar specification, v0.4 discloses the use of the vCalendar format in point-to-point communication (p. 1, paragraph 4), where vCalendar data streams are created with

Art Unit: 2617

a vCalendar Writer and are read with a vCalendar reader (p. 1, paragraph 6). It would have been obvious to one of ordinary skill in the art at the time that the invention was made to modify Daniels to include the use of a vCalendar format, such as that taught by vCalendar Specification, v0.4 in order to collect and communicate PDI information across e-mail (p. 1, paragraph 2).

Referring to claims **18, 22, 26, and 30**, the combination of Daniels and vCalendar specification, v0.4 teach the information processing apparatus according to claims 15, 19, 23, and 27, respectively, wherein the transmitted data comprises text data including the information specifying the date and time of starting the recording, the recording start date and time specifying information being stated next to the information indicating the start of the recording reservation data "BEGIN:VCALENDAR" (vCalendar Specification v0.4 p. 5, 2.2.1), "DTSTART:" (vCalendar Specification v0.4 p. 6, 2.1.2), the information specifying the date and time of end of recording, the recording end date and time specifying information being stated next to "DTEND:" (vCalendar Specification v0.4 p. 23, paragraph 2.3.11), the information specifying a channel for recording, the channel specifying information being stated next to "LOCATION:" (vCalendar Specification v0.4 p. 24, 2.3.15), the name of a program for recording, recorded next to "DESCRIPTION:" (vCalendar Specification v0.4 p. 6, 2.1.3) , and the information "END:VCALENDAR" (vCalendar Specification v0.4 p. 5, 2.2.1) indicating the end of the recording reservation data.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
